

ENVIRONMENTAL POLICY

Environmental Policy of Harsco Infrastructure - Section 1 EN001

Harsco Infrastructure is a supplier of products and services for Building, Civil Engineering, Industrial and Event Support Applications. The product range includes mast climbing work platforms, various types of scaffolding and aluminium towers, formwork and related products, powered access equipment, ROVACABIN® temporary accommodation, building and site products, as well as scaffolding and related services.

In respect to the activities it can control or expect to have reasonable influence on, Harsco Infrastructure recognises its responsibility for protecting the environment and this policy is a statement of that commitment. Therefore, Harsco Infrastructure will: -

1. Continue to reduce the environmental impact of our activities, products and services by implementing a system of continual improvement of Harsco Infrastructure's operations and environmental performance
2. Continue to invest in cost effective energy efficiency and conservation.
3. Use non-renewable and natural resources efficiently, with careful planning, and apply the principles of sustainability where practicable
4. Control and reduce waste and recycle or re-use material wherever possible, reduce the impact on landfill disposal, and reduce the usage of 'consumables'
5. Apply controls to the storage/use of products and materials to avoid land and ground water contamination occurring
6. Reduce emissions to air, hence reducing contributions to global warming, acid rain and local air quality;
7. Improve the visual impact of the operational sites and, where possible, reduce noise generated from the sites
8. Ensure our activities are safe for our employees, customers, the public, sub-contractors, neighbours and others associated with our business

Harsco Infrastructure are committed to complying with the applicable environmental legal and regulatory requirements, and other requirements to which Harsco Infrastructure subscribes, which relate to Harsco infrastructure's environmental aspects. Harsco Infrastructure are also committed to the prevention of pollution.

In order to ensure effective management of this policy, Harsco Infrastructure will: -

- Create a management programme with objectives, and set performance targets;
- Develop control procedures, and employ monitoring and measurement methods to ensure this is done;
- Audit, and every 4 months review, environmental performance and the effectiveness of the Environmental Management System through the Health, Safety, Environmental and Quality meeting forum;
- Integrate environmental considerations into future policy decisions;
- Recognise and encourage the contribution every employee can make towards improving Harsco Infrastructure's environmental performance.

This policy and its associated procedures are to be followed by all employees and any others working for or on behalf of Harsco Infrastructure. This policy will be communicated to customers, suppliers, and be available to the public.

In order to achieve the above, an Environmental Management System is established and will be maintained, incorporating the requirements of ISO14001:2004.

The Harsco Infrastructure Environmental Management System shall be reviewed annually or more frequently if there is any substantial change to Harsco Infrastructure personnel and procedures.

Paul O'Kelly
 Managing Director, Harsco Infrastructure Europe
 Date Effective : 22nd December 2010
